## Profile

---

Entry level Engineer with 1 Year of experience in Web dev. I view Coding language's/Stack's as a tool to solve problems and craft products that people love.

## Education

---

College of Enignieering and Technology, Akola, BE in Computer Science and Engineering      Sept 2021 – May 2025

## Experience

---

Full Stack Intern, – Agiled Coders      June 2024 – July 2024

- Helped The team to make their MVP, as it was a early stage startup
- Implemented Backend logic - wrote service layers , caching logic etc
- Added some tools to the web app like winston logger, swagger.js

## Projects

---

Secure Routes      <https://github.com/AdityaUmale/SecureRoutes>

- Secure Routes acts as a proxy server between your client and original server, and helps you to implement security measures.
- User can add Rate limiting, track IP for any given Api route and hence prevent server crashes and data scraipiung.
- Tools Used: React, express.js, mongoDb, TailwindCss

College Community Portal      <https://github.com/AdityaUmale/CollegeCommunityPortal>

- Tried to solve the problem of lack of awareness and communication in my college
- Added features like Club management, prev year question papers, annouencements section, suggestion box, Events, roadmaps for juniors etc.
- Tools Used: Nextjs, express.js, mongoDb, TailwindCss

## Additional Experience And Awards

---

Avishkar Competition: Presented a Prototype for our Idea

Third Prize(District): Awarded 3rd prize for our Project Prototype

## Technologies

---

Languages: JavaScript, TypeScript, SQL

Frameworks/Libraries: React, Nextjs, ExpressJs, Nodejs, Zod, Tailwind

**Software:** git, github, vsCode, Postman, docker
